EDUCATION

University of Maryland, Robert H. Smith School of Business

May 2027

Bachelor of Science, Information Risk Management and Business Analytics (OMBA); Minor: Operations Management

Relevant Coursework: Machine Learning, Data Structures, OOP I & II, Business Statistics, Financial & Managerial Accounting, Business Finance, Business Law, Info Risk Management & Privacy, International Business

Honors: Presidential Scholarship Recipient | PJAS Environmental Science – 1st place District & State, 2023–2025 | Naval Horizon Essay Writing Award, 2024

WORK EXPERIENCE

IBM

San Jose, California

Software Development Engineer Intern

May 2026 – August 2026

- Engineering backend systems and cloud-native services on IBM's AI platform — building agentic workflows and REST APIs within an agile team of senior engineers
- Developing, testing, and debugging production software components for IBM's hybrid cloud product suite using Java, CI/CD pipelines, and Git; participating in design reviews and sprint planning
- Applying data structures, OOP principles, and modern engineering workflows to deliver scalable, enterprise-grade software across cross-functional teams

Ascendion

Philadelphia, PA

Machine Learning Engineer Intern

May 2023 – August 2024

Summer 2023:

- Designed ML models to optimize clinical trial patient cohort groupings, reducing outcome variability by ~15%; automated site selection and risk-scoring pipelines, cutting analysis time by 30%
- Streamlined patient recruitment analytics across 50+ clinical trial sites, contributing to a 15–20% reduction in enrollment delays and supporting on-schedule study initiation

Summer 2024:

- Engineered real-time predictive risk models to track protocol adherence and proactively flag deviations during trial execution, reducing incidents by ~25%
- Designed a Flask REST API integrating ML and NLP models into a production healthcare diagnostic chatbot, cutting response latency by ~30% and improving diagnostic accuracy by ~20%

PROJECTS

MealMatch — Bitcamp 2026 Hackathon,

React · Flask · PostgreSQL · JWT Auth · Geocoding API · Python

2026

- Built a full-stack food redistribution platform (4 user roles: restaurant, recipient, partner, admin) with JWT/EBT auth, real-time listing feeds, and a smart match-score ranking by proximity, dietary tags, and urgency to reduce food waste
- Implemented partner-priority windows, pickup-slot scheduling, live countdown timers, admin audit logs, and a demand prediction endpoint on a scalable Flask + PostgreSQL backend

AthleteIQ — NBA Analytics Platform,

Python · Machine Learning · AI · REST APIs · Data Visualization

2026

- Built a full-stack NBA analytics platform with AI-generated scouting reports, ML performance predictions, and real-time player statistics integrating live sports data APIs

Unbiased Recidivism Risk Assessment — Inspirit AI Scholars, Stanford,

Python · Scikit-learn · Pandas · Fairness ML

June 2025 – August 2025

- Developed an ML model predicting recidivism risk while minimizing systemic racial and socioeconomic bias; evaluated across equalized odds, demographic parity, and precision-recall tradeoffs — won 1st Place for best AI algorithm

ACTIVITIES

OMBA Society,

University of Maryland

August 2025 – Present

- Engaged in SQL, Python & ML technical workshops; collaborated on business case analyses using statistical modeling and data-driven strategies to optimize organizational processes

Teens Teach Technology,

Chapter Leader

September 2022 – Present

- Led digital literacy workshops for elderly adults, bridging the digital divide; mentored junior volunteers, coordinated lesson delivery, and expanded program reach and impact

CB South Tennis / UMD Club Tennis,

Varsity

February 2021 – Present

- 2nd/3rd varsity doubles team for 3 consecutive years; won Best Doubles Team in PA; now competing at UMD Club level

SKILLS

Programming: Java, Python, JavaScript (ES6+), React, Flask, HTML/CSS, SQL, C++

AI & Machine Learning: Scikit-learn, Neural Networks, NLP, LLMs, Agentic AI, Feature Engineering, Fairness ML, Prompt Engineering, Pandas, NumPy, Tableau

Cloud & DevOps: Azure, Git/GitHub, CI/CD Pipelines, REST APIs, PostgreSQL, JWT Auth, Postman, Docker

Business & Design: MS Office Suite, Google Workspace, Financial Analysis, Adobe Creative Suite, 3D Design, Illustration
